

## SWEN502 Mobile Report

(Dan Luo - 300XXXX96)

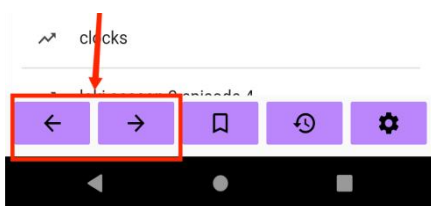

### 1. Search Bar / Set Home Screen

- The search bar can be used to search for a specific URL.
- The home screen is default as the Google search, however, change a website and click the home icon on the top right to set the the current page as home screen. When set the home screen, a message will pop up.

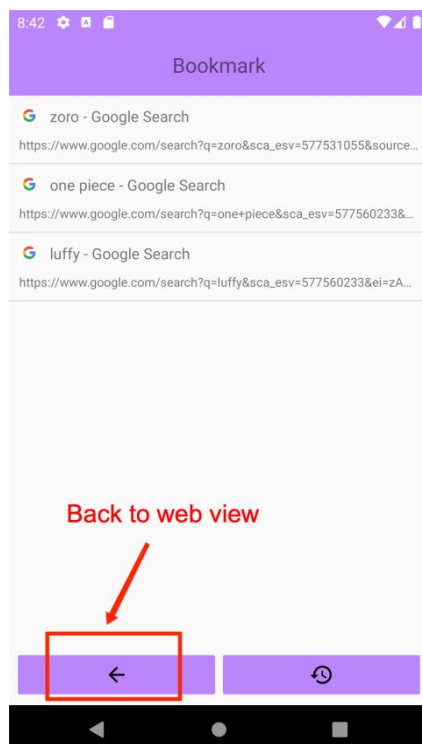

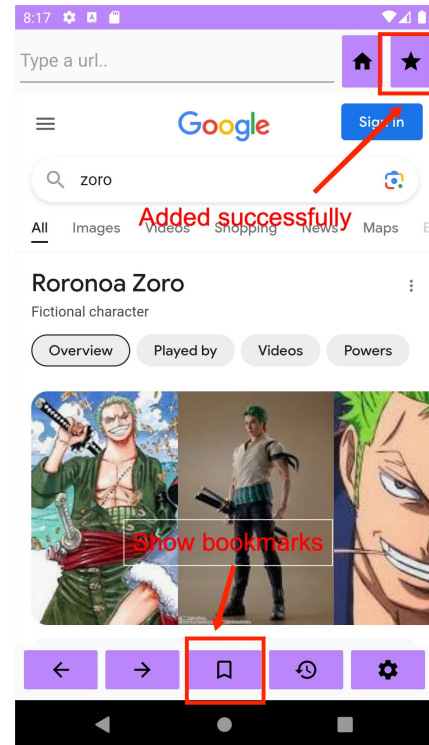

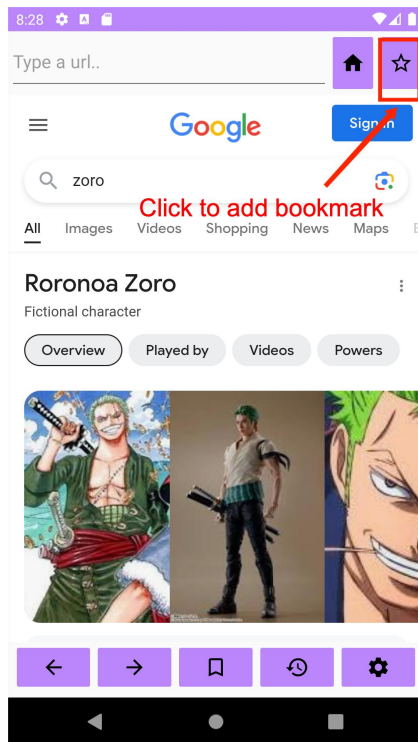

### 2. Go Back / Go Forward

- These two buttons enable forward and backward movement of web pages

### 3. Bookmark

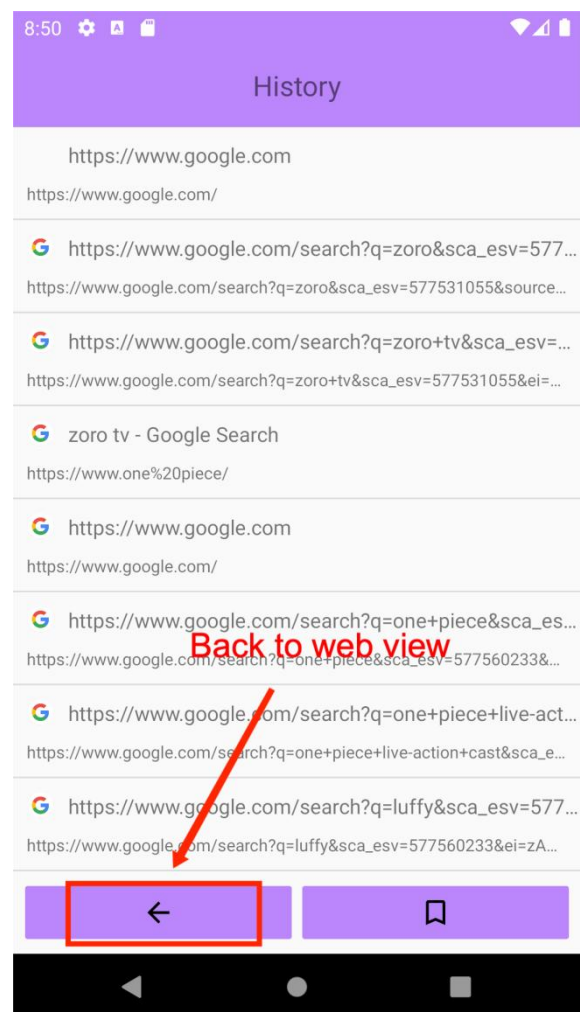

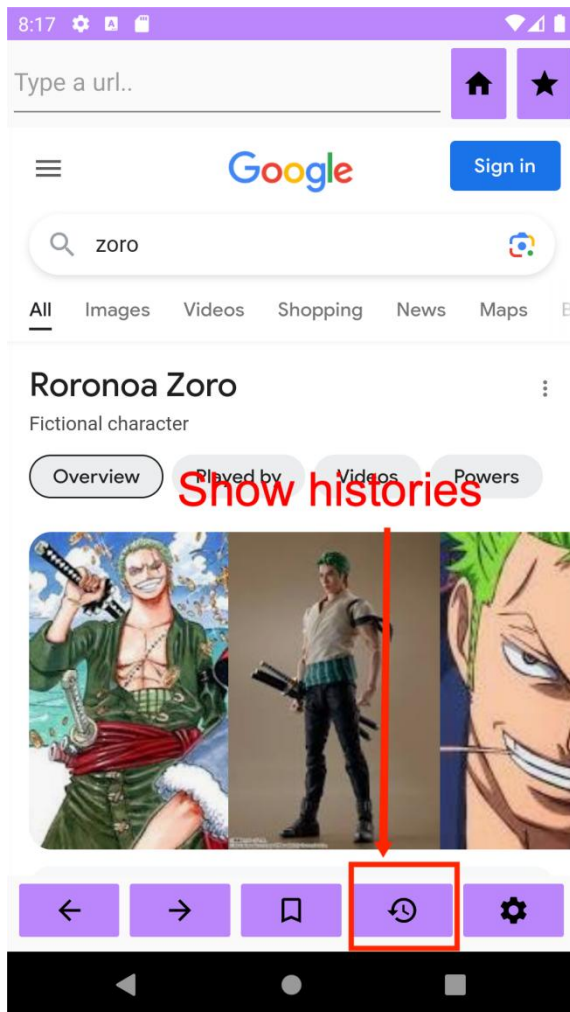

- Click the empty star icon to add the current web page as a bookmark. When the empty star turns to a solid star, then the bookmark added successfully.
- Click the solid star icon again to remove the current page from bookmark.

- Click on one of the bookmarks in the list to navigate to the corresponding web page.
- Click the left-pointing arrow icon to go back to web view page.
- Whenever the page is bookmarked, the star at the top right corner is always solid.

#### 4. History

- Click the clock icon in the bottom right to view browser histories.
- Click the left-pointing arrow icon to go back to web view page.
- Click on one of the histories in the list to navigate to the corresponding web page.

## 5. Change Theme

- Click the settings icon in the bottom right to change themes.
- Thank you so much for your time!
